

## HEAD FOR SIMULATION OF ORAL AND NASAL SWABS

Learn how to properly executed NP swab for respiratory infections according to the procedure. Collect a Nasopharyngeal (NP) swab, amygdala, buccal, throat, nasal mucosa.

Nasopharyngeal swabs are used for the detection of respiratory viruses such as RSV, covid-19 (Coronavirus), influenza virus A & B or parainfluenza virus. A properly collected viral swab (Saliva or oral-fluid specimens) is necessary for detection of these organisms.

The only simulator on the market designed specifically for swab training :

- MedicSkin® realistic skin feeling
- Non staining
- Hypoallergenic
- Injectable, injections may be performed on the entire product (MedicSkin®)
- Easy maintenance

### Choose your color

All our MedicSkin® products are available in a choice of 3 colors, this allows you to adapt the products to the color of your manikins (Depending on the brand you have. Ex.: CAE Healthcare™, Laerdal Medical™, Gaumard™, Nasco™, Sakamoto™, 3B Scientific®, or some other manufacturers), or for your task trainers, your busts or arms, or to use the products to fit also during your simulation with standardized patients.

### Straps

As an option (Check the description and reference number) you can order our injection products with an adjustable strap to attach them to your manikins or standardized patients.

### MedicSkin®

Every product is made of our realistic MedicSkin®, an innovative material that offers a high level of realism, hypoallergenic, which does not mold, is durable and above all with an easy maintenance. With MedicSkin®, the needle tracks disappear with minimal damage.

### Liquid injection

All products are injectables, it means that you can inject air on MedicSkin®. If it's specified, you can inject liquid in the trainers, a special sponge inside the product absorbs the liquid until saturation, evacuate it easily through the drain. (Rinse with distilled water)

### Ultrasounds

The trainers are also ultrasound scannable for ultrasound simulation. For example, use the IV arm for your training for ultrasound-guided intravenous (IV) access. (Showing the user the needle or catheter).
