

NN-P-001 PREMATURE (PRETERM) NEWBORN

PREMATURE (PRETERM) NEWBORN

The preterm newborn paediatric simulator with realistic airway, CRP training capability, nasal cannula and endotracheal insertion and umbilical cord will help your students to strengthen skills.

The premature newborn simulator is entirely composed of the MedicSkin®, it is soft to the touch, easy to clean and durable. Malleable, with a realistic weight of a 25-week-old infant (400g - 500g), it will meet your needs and allow you to make your simulations more real.

This simulator will allow you variety of nursing and medical procedures:

- Cardiopulmonary resuscitation CPR (Ventilation: chest rise and fall with mechanical ventilation)
- Cannula insertion and Guedel cannula (Endotracheal intubation)
- The umbilical cord is removable
- Traumatic care
- Intramuscular injection (Air)

MedicSkin®

Every product is made of our realistic MedicSkin®, an innovative material that offers a high level of realism, hypoallergenic, which does not mold, is durable and above all with an easy maintenance. With MedicSkin®, the needle tracks disappear with minimal damage.

Liquid injection

All products are injectables, it means that you can inject air on MedicSkin®. If it's specified, you can inject liquid in the trainers, a special sponge inside the product absorbs the liquid until saturation, evacuate it easily through the drain. (Rinse with distilled water)

Ultrasounds

The trainers are also ultrasound scannable for ultrasound simulation. For example, use the IV arm for your training for ultrasound-guided intravenous (IV) access. (Showing the user the needle or catheter).
